

Affinage Colour Wheel

- Each ring of the colour wheel represents a level of depth.
- Darker colours are closest to the centre of the colour wheel.
- Light colours are furthest from the centre of the colour wheel.
- .0 and .00 are a unique blend of many tones from the colour wheel to create their NEUTRAL status. Therefore they cannot be shown graphically on this wheel.
- Affinage Intensives are marked on the outside of the colour wheel.
- **0.76** Intensives 0.76 is not shown on the colour wheel above as it cannot be accurately positioned.
