lite
High Performance Powder Bleach

Affinage Lite is a high performance powder bleach suitable for all types of bleaching techniques. The gentle formula can be used with 3%(10vol), 6%(20vol), 9%(30vol) and 12%(40vol) developers to achieve high lifting power with optimum hair condition. Lite contains Hydrolysed Collagen to eliminate damage and retain elasticity. Lite is available in both blue and white powder. For best results use Affinage Crème Developer.

Mixing Instructions
Mix one scoop of Lite powder with your chosen strength of Affinage Crème Developer (according to lift required) until you achieve a creamy consistency. You may vary the consistency by adding slightly different amounts of developer according to the technique you wish to use, i.e. full head, foil or cap highlights, etc.

Application
Full Head application, Lite should be applied to the middle lengths and ends first and then to roots .
On re-growth - apply Lite to the roots only.

Development Time
Lite is active for up to 60 minutes.

For very dark hair processing time may take up to 50 minutes.
Light bases may require only a short processing time. Check frequently.

Remember
Resistant hair will need a longer development time than porous hair. Always check development of Lite during processing.
When the required lift is achieved rinse thoroughly and gently shampoo the hair.

Highlighting
Do not wash the hair before application. Use desired method of highlighting, i.e. foil, meches, highlighting cap, etc. Apply Lite liberally to the hair. Check development time frequently.

Important
DO NOT apply to the scalp if there are any abrasions or signs of irritation. DO NOT mix the product in a confined space and avoid inhaling the powder. If the product gets into the eyes wash immediately with cold water. Always use rubber gloves.
